PART 0: What You Are Actually Building

From your PDF , you are creating:

👉 A **Student Management System in Salesforce**
Which includes:

- Students (data table)
- Courses (data table)
- Enrollment (link between both)
- App + Reports + Dashboard

Think of Salesforce like:

Excel + Database + UI + Automation all in one

🟢 STEP 1: Create Salesforce Account (VERY FIRST STEP)

👉 Go here:

- 🌐 https://developer.salesforce.com/signup

👉 What to fill:

- First Name / Last Name
- Email (important)
- Role → **Student**
- Company → anything (e.g., CollegeProject)
- Username → MUST be unique (use email + .sf)

Example:

utkarsha@gmail.com → utkarsha@gmail.com.sf

👉 After signup:

- Check email → click verification link

- Set password

⚪ STEP 2: Open Salesforce Dashboard

After login, you'll see:
👉 Salesforce Home

Now:

👉 Click:

⚙️ Top right → **Setup**

⚪ STEP 3: Create "Student" Object (Database Table)

From your PDF

👉 Navigation:

Setup → Search box → **Object Manager**

Click:
👉 Object Manager → **Create** → **Custom Object**

👉 Fill details:

Field	Value
Label	Student
Plural	Students

Record Name	Student ID
Data Type	Auto Number
Format	STU-{0000}

☑️ Tick these:

✓ Allow Reports
✓ Allow Activities
✓ Allow Search

👉 Click **Save**

👉 Create Tab (IMPORTANT)

After saving:

Click:
👉 **Create Tab**

Choose:

- Icon → any (student icon)

Click → **Next** → **Next** → **Save**

⚪ Add Fields to Student

Go:
👉 Object Manager → Student → Fields & Relationships → **New**

Now create each field:

1. First Name

- Type → Text
- Length → 50

2. Last Name

- Type → Text

3. Email

- Type → Email

4. Phone

- Type → Phone

5. Date of Birth

- Type → Date

6. Gender

- Type → Picklist
  Values:

Male
Female
Other

7. Department

CS
IT
EnTC
Mechanical
Civil

8. Year

FE
SE
TE
BE

9. Address

- Type → Text Area

⚪ STEP 4: Create "Course" Object

👉 Same process again

Navigation:

Setup → Object Manager → Create → Custom Object

Fill:

Field	Value
Label	Course
Record Name	Course Name
Type	Text

Fields to create:

- Course Code → Text
- Credits → Number
- Department → Picklist
- Instructor → Text

⚪ STEP 5: Create "Enrollment" Object (IMPORTANT)

This is **most important concept** → Many-to-Many relationship

From your PDF

Create Object:

Label → Enrollment
Record Name → ENR-{0000} (Auto Number)

Now create relationships:

👉 Field 1:

Type → **Master-Detail Relationship**

Select:
👉 Student

👉 Field 2:

Again → Master-Detail

Select:
👉 Course

Add fields:

- Enrollment Date → Date
- Grade → Picklist

A
B
C
D
F

🟢 STEP 6: Create Lightning App

👉 Navigation:

Setup → Search → **App Manager**

Click:
👉 New Lightning App

Fill:

- App Name → Student Management System

Click → Next

Add Navigation Items:

Move from left to right:

✓ Students
✓ Courses
✓ Enrollments
✓ Reports
✓ Dashboards

Assign Profile:

✓ System Administrator

Click → Save

🟢 STEP 7: Open Your App

👉 Click:
Top Left → **App Launcher (9 dots)**

Search:
👉 Student Management System

Open it

⚪ STEP 8: Insert Data (VERY EASY)

From your PDF

👉 Add Students:

Click → Students → New

Fill:

- Name
- Email
- Department etc.

Save

👉 Add Courses:

Same process

👉 Add Enrollment:

- Select Student
- Select Course
- Add Date + Grade

⚪ STEP 9: Create Report

👉 Navigation:

Reports Tab → New Report

Choose:
👉 Students

Add columns:

- First Name
- Last Name
- Gender

Group:

👉 Drag Gender into "Group Rows"

Save:

Name:
👉 Students by Gender

⚪ STEP 10: Create Dashboard

👉 Navigation:

Dashboards → New Dashboard

Add:

1. Donut Chart

- Use → Students by Gender report

2. Metric

- Show → Total Students

🎯 FINAL RESULT

You now have:
✓ Database (Objects)
✓ Relationships
✓ UI App
✓ Data
✓ Reports
✓ Dashboard
